

Lab TA Evaluation

Lab section:

We are interested in improving TA performance through student feedback. While the letter grades below are important to us, we can more easily improve our teaching through **constructive** feedback on the teaching and on the lab content. For example, it is better to provide specific examples of things that went well, or things that could be improved, rather than general or vague comments.

Helpful: "You speak softly and it is hard for me to hear when I sit in the back."

Less helpful: "Poor presentation delivery."

Please grade and provide a comment on each of these **lab components**

A is "The lab part of this course exceeded my expectations"

B is "The lab part of this course was better than average"

C is "The lab part of this course was average"

D is "The lab part of this course was below average"

	A	B	C	D
